PROFESSIONAL SUMMARY

Software Engineering undergraduate with hands-on experience in full-stack web development, REST API integration, and database-driven applications. Skilled in Java, Spring Boot, React.js, Node.js, Express.js, MongoDB, MySQL, and Git/GitHub. Experienced in developing academic and real-world projects, including MERN stack systems, with a strong interest in building practical software solutions and AI-powered applications.

PROJECTS & EXPERIENCE

Millennium Werkstatt - Smart Garage Management System

Real-World Customer-Based MERN Stack Project | 2026

- Developed a customer-focused garage management platform for service bookings, vehicle records, appointments, inventory, employees, invoices, payments, and admin workflows.
- Built with React.js, Node.js, Express.js, MongoDB, JWT authentication, responsive UI design, and AI-assisted support concepts.

AI-Based Virtual Fashion Try-On Website

Currently Developing Project | 2026

- Designing an intelligent fashion try-on web platform that helps users visualize outfit selections and improve size/style confidence before purchase.
- Focus areas include responsive UI, body-size matching concepts, product filtering, and future AI-based outfit recommendation features.

CD Music Academy Web Application

Full-Stack Development Project | Completed 2025

- Engineered a web platform to manage music academy operations, student enrollment, inventory, and administrative workflows using Java, Spring Boot, and MySQL.

Lost & Found Mobile Application

React Native / Expo + MERN Backend | Academic Project

- Developed a mobile-first lost and found platform with authentication, item posting, image upload, reporting, status management, and REST APIs.

Wedding Management System

2nd Year Group Project | 2024

- Implemented a booking and package management system using Java, Spring Boot, and MySQL, supporting service selection and scheduling features.

Medical Appointment Scheduling System

Java / JSP / Servlet Project | 2023

- Developed a medical appointment management portal with Java, Apache Tomcat, SQL, priority queue scheduling, and CRUD operations.

TECHNICAL SKILLS

Frontend: React.js, JavaScript, HTML, CSS, Tailwind CSS, Responsive UI

Backend: Node.js, Express.js, Java, Spring Boot, REST APIs, JWT

Database: MongoDB, MongoDB Atlas, MySQL, SQL, Mongoose

Tools: Git, GitHub, Vercel, VS Code, Postman, IntelliJ IDEA

Mobile / AI: React Native, Expo, Python basics, AI fundamentals

EDUCATION

B.Sc. in Information Technology

Specializing in Software Engineering
Sri Lanka Institute of Information Technology (SLIIT)
June 2023 - Present

G.C.E. Advanced Level

Bio Stream
H. Debarawewa Central College
Results: 2C, 1S

CORE STRENGTHS

- Problem-Solving
- Analytical Thinking
- Team Collaboration
- Communication
- Project Management
- Database Design
- Web Development
